For Immediate Release

**BCGOLD CORP. EXPLORATION UPDATE
CARMACKS COPPER-GOLD PROPERTIES, YUKON**

Vancouver, British Columbia, July 6, 2009 (TSX-V: BCG) – BCGold Corp. ("BCGold" or the "Company") is pleased to announce that Phase I field work has been concluded on the Company's Carmacks Copper Gold Property package in central Yukon. A geologist / prospector team conducted 48 man days of geological mapping and prospecting, focusing on coincidental induced polarization (I.P.) and copper (\pm gold) mobile metal ion (MMITM) anomalies believed to possibly represent "Minto-type", high-grade copper-gold mineralization near surface and at depth.

Trenching and diamond drill targets have been confirmed on 6 of BCGold's 17 Carmacks Copper Gold Properties. Phase II exploration, entailing excavator trenching, road and drill pad construction, additional geochemical and geophysical survey work, mapping and sampling has commenced. Diamond drilling of priority targets is scheduled for later this summer. For the year 2009, BCGold has been awarded \$135,000 in exploration grants under the Yukon Mineral Incentive Program (Y.M.I.P.) and the Company is currently completing a \$1 million financing.

Minto Property Block

BCGold's Minto Block of properties consists of 6 properties immediately northward and along trend from the Minto mine and the new Minto North high-grade copper-gold discovery. To view BCGold's Minto Block properties, please view the following link: ([Minto Block - I.P. & Copper MMI Anomalies](#)). BCGold field crews investigated a number of coincidental I.P. and copper (\pm gold) MMITM anomalies defined by BCGold on the Toe, Pepper and Spear claims in 2008. Field inspection has validated these anomalies and diamond drill testing has been recommended by a Company consultant. BCGold is actively looking for joint venture partners to advance these 3 properties.

BCGold has commenced a follow-up MMITM survey on the Apex East claim to close off copper anomalies defined by BCGold in 2008. A subsequent I.P. survey is planned over the most promising targets.

Carmacks Property Block

Field crews investigated 3 properties within the Company's Carmacks Block of properties, situated 50 kilometres to the south, adjacent to Western Copper Corp.'s Carmacks Copper Project. On the WS Property, trenching has been recommended on the recently discovered Copper Hill showing, where sampling in 2008 returned maximum values of 0.85% copper and 0.42 g/t gold. The showing consists of malachite, lesser chrysocolla, minor azurite, with significant chalcocite mineralization, primarily hosted by more mafic, foliated zones of quartz diorite within coarse grained granodiorite.

Excavator trenching is to be conducted across the Copper Hill showing and along strike in both directions. A 600 metre by generally 100 metre wide copper MMITM soil anomaly lays 150 metres upslope of the Copper Hill showing. The soil anomaly is coincident with an I.P. chargeability high – resistivity anomaly. These coincidental anomalies are also to be systematically trenched.

Trenching has also been proposed above and along strike of BCGold's 2008 copper discovery in drill hole BCG08-09B, which intersected 63.1 metres that averaged 0.17% copper, (containing 23.6 m averaging 0.34% copper) near surface and immediately south of Western Copper Corp.'s Carmacks Copper Project.

The technical contents of this release have been reviewed by Ms. Jean Pautler, P.Geo., a Qualified Person for the purposes of National Instrument 43-101.

About BCGold Corp.

BCGold Corp. (TSX-V: BCG) is a Vancouver-based junior resource company focused on copper and gold exploration in under-explored historic mining and exploration districts in British Columbia and Yukon. BCGold Corp. acquires and develops conceptual, early and mid-stage, exploration opportunities and advances them towards resource development by using internal expertise, engaging preferred joint venture partners, and creating strategic alliances with major exploration and mining companies.

On behalf of the Board of Directors,

Brian P. Fowler, P. Geo.
President & CEO
