For Immediate Release

BCGOLD CORP. ADVANCES MINTO AREA PROPERTIES

Vancouver, British Columbia, September 9, 2009 (TSX-V: BCG) – BCGold Corp. ("BCGold" or the "Company") is pleased to announce that exploration field work has been accelerated on the Company's 6 Minto-area copper-gold properties ("Minto Block"), strategically situated north and along trend with Capstone Mining Corp.'s high-grade copper-gold Minto mine in central Yukon. The highly prospective nature of the area has been exemplified by Capstone's continued exploration success at their recently discovered Minto North high grade copper-gold deposit; situated 600 metres north of the current open pit mine. To view BCGold's Minto Block properties, please view the following link: ([Minto Block - I.P. & Copper MMI Anomalies](#)).

BCGold has commenced a 17 kilometre induced polarization (I.P.) survey on the Company's Apex East Property, immediately north of the Minto Mine property, following up a number of magnetic and copper \pm gold mobile metal ion (M.M.I.TM) anomalies outlined by previous property-wide surveys. The Company expects the I.P. survey will define a number of "Minto-style" copper-gold drill targets which could be drill tested later this year.

This past summer, BCGold completed detailed geological mapping, prospecting and sampling programs on 5 properties north of Minto mine, following up copper \pm gold soil M.M.I.TM anomalies and coincidental "Minto-type" magnetic and I.P. anomalies defined previously by BCGold. The Company is in receipt of NI43-101 technical reports for the Toe and Pepper properties, recently prepared by Company consultant Jean Pautler, P.Geo., that recommend additional I.P. survey work and diamond drilling on both properties. The Toe and Pepper properties meet the requirements of a "Qualifying Transaction" (QT), for the purposes of the Policies of the TSX Venture Exchange (the "Exchange") and BCGold is currently seeking suitable joint venture partners to advance them.

In addition, exploration field work continues on BCGold's Carmacks Block of properties, situated 50 kilometres to the south, adjacent to Western Copper Corp.'s recently permitted Carmacks Copper Project. A staged work program entailing geological mapping, prospecting and I.P. surveys is underway. The Company recently received a Class III Approval exploration permit from the Yukon government and an excavator trenching program has commenced on the WS property.

Carmacks Copper-Gold Properties

BCGold Corp. has an option earn 100% interest in 17 mineral properties (17,125 hectares) strategically located proximal and adjacent to Capstone Mining Corp.'s currently producing Minto Mine and Western Copper's recently permitted Carmacks Copper Project. The Company has been methodically exploring the Carmacks Copper-Gold Properties since 2006, having incurred in excess of \$3.0 million in exploration expenditures to date. BCGold has discovered 7 copper-gold mineralized zones to date, including a 63.1 metre drill hole intercept from the WS property averaging 0.17% Cu (including 23.6 meters averaging 0.34% Cu).

About BCGold Corp.

BCGold Corp. (TSX-V: BCG) is a Vancouver-based junior resource company focused on copper and gold exploration in under-explored historic mining and exploration districts in British Columbia and Yukon. BCGold Corp. acquires and develops conceptual, early and mid-stage, exploration opportunities and advances them towards resource development by using internal expertise, engaging preferred joint venture partners, and creating strategic alliances with major exploration and mining companies.

On behalf of the Board of Directors,

Brian P. Fowler, P. Geo.
President & CEO
