**For Immediate Release**

**BCGOLD CORP. AND KAMINAK GOLD CORP. EXPAND GOLD ZONE  
 AT VOIGTBERG PROPERTY, NORTHWESTERN B.C.**

**Vancouver, BC – January 18, 2008 - BCGold Corp.** ("BCGold" or the "Company") and project partner Kaminak Gold Corp. ("Kaminak") (TSX-V: KAM) wish to announce that assay results have been received for the Company's 2007 diamond drill program on the Voigtberg Au-Cu-Mo Property, situated 40 km east of the high-profile Galore Creek Cu-Au-Ag project in northwest British Columbia.

A 4-hole, 587 m drill program tested 1 new geophysical and geochemical target (North Zone) and followed-up last year's significant "Gold Zone" drill hole intercept of 51.15 m @ 1.03 g/t Au, including 18.17 m @ 1.87 g/t Au in drill hole VGT06-05. Significant results are tabulated below.

**Table 1. Voigtberg Property  
 2007 Significant Drillhole Intersections**

Drillhole	From	To	Interval	Au	Cu	Mo
	(metres)	(metres)	(metres)	(g/t)	(ppm)	(ppm)
<b>VGT07-08</b>	3.64	31.10	<b>27.46</b>	<b>0.16</b>	<b>203</b>	<b>5</b>
	36.48	113.10	<b>76.62</b>	<b>0.22</b>	<b>488</b>	<b>13</b>
	169.15	194.80	<b>25.65</b>	<b>0.22</b>	<b>219</b>	<b>5</b>
<b>VGT07-09 Including</b>	4.26	45.60	<b>41.34</b>	<b>0.18</b>	<b>144</b>	<b>191</b>
	4.26	18.26	<b>14.00</b>	<b>0.15</b>	<b>118</b>	<b>509</b>
	64.71	100.32	<b>35.61</b>	<b>0.14</b>	<b>168</b>	<b>19</b>
<b>VGT07-10 Including Including</b>	40.00	116.40	<b>76.40</b>	<b>0.41</b>	<b>168</b>	<b>32</b>
	51.68	91.2	<b>39.52</b>	<b>0.48</b>	<b>156</b>	<b>27</b>
	54.72	71.5	<b>16.78</b>	<b>0.72</b>	<b>15</b>	<b>46</b>

A Gold Zone step-out hole to the west and a North Zone drillhole (VGT07-11) were cancelled and abandoned respectively, owing to difficult pad building and drilling conditions. The Gold Zone has now been partially defined by 6 drill holes over a strike length of 300 m and remains open along strike and at depth.

*Gold Zone Drilling Results*

Drill hole VGT07-10 was collared 75 m north-eastward of 2006 drill hole VGT06-05 and intersected a series of pyritic andesite/dacite flows and lapilli tuff, cut by a multitude of narrow monzonite dykes. A broad interval of low grade gold mineralization, averaging 0.41 g/t Au over 76.40 m, is associated with this geology. Within this interval a 16.78 m segment averaged 0.72 g/t Au.

Drill hole VGT07-08 was collared 250 m south of hole VGT06-05 to test the southern limits of the Gold Zone and this hole intersected similar geology and mineralization with comparably low gold grades (0.16 – 0.22 g/t Au) over appreciable widths (25.65m to 76.62 m).

*North Zone Drilling Results*

Drill hole VGT07-09 was collared in the middle of the North Zone copper-molybdenum soil geochemical anomaly and coincident induced polarization (I.P.) chargeability anomaly. This hole intersected mainly pyrite-bearing dacite/andesite flows with rare monzonite dykes. A near-surface interval of 41.34 m averaged 0.18 g/t Au and 0.019% Mo, including 14 m of 0.05% Mo from 4.26 m to 18.26 m. The North Zone I.P. anomaly remains open to the north.

*2007 Exploration Program*

BCGold and Kaminak completed a two-phase, \$500,000 exploration program at Voigtberg in 2007. As a precursor to the diamond drilling described above, a property-wide, 404 line kilometre airborne geophysical survey was conducted by Fugro Airborne Surveys Corp., utilizing their proprietary frequency domain electromagnetic "DIGHEM" and standard magnetometer systems. Interpretation was provided by consulting geophysicist Mr. Jan Klein, P.Geo., P.Eng.

Geological mapping and prospecting was performed throughout the property, focusing on recently acquired ground to the east and south of the known zones of interest. A total of 322 soil samples (grid and contour) and 8 silt samples were collected; silt samples throughout the property contain highly anomalous values in gold, copper and molybdenum, consistently at the ninety-fifth percentile or greater for regional government silt sample results.

All aspects of the 2007 Voigtberg exploration program were supervised by Equity Engineering Ltd. of Vancouver, British Columbia. All samples were analyzed by ALS Chemex, North Vancouver, BC, using ICP- AES (ME-ICP41) analyses for trace element geochemistry and fire assay for gold (Au-AA23). Murray Jones, P.Geo. is the Qualified Person for the purposes of National Instrument 43-101 and has reviewed the technical content of this news release.

*About the Joint Venture Agreement*

BCGold has an option to acquire up to 60% interest in the Voigtberg Property by making \$2,000,000 in exploration expenditures over four years and by issuing 400,000 units of BCGold to Kaminak Gold Corporation. BCGold can earn an additional 10% interest in the Property by completing a bankable feasibility study, for a total earn-in of 70%.

*About BCGold Corp.*

BCGold Corp. (TSX-V: BCG) is a Vancouver-based junior resource company focused on base and precious metal exploration in under-explored historic mining and exploration districts in British Columbia and Yukon. BCGold acquires and advances conceptual, early and mid-stage, quality exploration opportunities towards resource development utilizing internal expertise and by engaging preferred joint venture partners.

On behalf of the Board of Directors,

Brian P. Fowler, P. Geo.  
President & CEO
