*About BCGold*

BCGold is a Vancouver-based junior resource company focused on copper and gold exploration in under-explored, historic and emerging mining districts in British Columbia and Yukon. The Company employs the prospect generator business model, acquiring and developing conceptual, early and mid-stage exploration opportunities. The Company grooms and vends these opportunities to worthy partners for further advancement. BCGold has generated 27 early to mid-stage gold and copper-gold properties in British Columbia and Yukon.

BCGold's primary gold asset is the 100% owned, historic high-grade gold Engineer Mine property, where the Company has defined a compelling gold concentrate production opportunity through continued bulk sampling and on-site milling. The Company has recently consolidated its land position at Engineer Mine, acquiring key claims believed to partially overlay the source area for the Engineer Mine gold mineralizing system. The Company's strategy at Engineer Mine is to focus exploration on an economic shear-hosted gold deposit and to continue efforts to secure a qualified partner to finance the gold concentrate production opportunity.
