

For Immediate Release

**BCGOLD CORP.
PROVIDES DISCLOSURE CLARIFICATION**

Vancouver, British Columbia, May 8, 2015 (TSX-V: BCG) – BCGold Corp. (“BCGold” or the “Company”) announces that as a result of a continuous disclosure review by the British Columbia Securities Commission (“BCSC”), it is issuing the following news release to retract and clarify its disclosure.

Restricted Disclosure of Economic Analysis

The Company’s corporate presentations, detailing the Company’s 100% owned Engineer Mine Property dated April 2015, include capital cost, forecast production, operating cost estimates, Net Present Value, Internal Rate of Return, and mine life. These were based on preliminary internal estimates. Information related to economic viability and planned production without at least a PEA cannot be disclosed. Any such production or financial information should not be relied upon and the Company has therefore retracted the statements. The Company is currently focused on exploration and gathering technical information for future design work and has no immediate plans to complete a study suitable for a PEA.

BCGold’s Engineer Mine property is a previously mined property with a current defined mineral resource as described in the NI 43-101 technical report titled ‘Engineer Gold Project, BC, Canada Mineral Resource Estimate’ prepared by SNOWDEN, dated April 6, 2011. Certificates for the QPs for this Technical Report are included in the report document.

It is the opinion of the Company’s Qualified Person, Brian P. Fowler, P.Ge., that the April 6, 2011 Technical Report is the current and valid Technical Report with respect to the Mineral Resource Statement.

The information in this News release has been reviewed by Brian P Fowler, P. Geo., BCGold Corp’s Qualified Person. Mr. Fowler is not independent of the Company.

About BCGold

BCGold is a Vancouver-based junior resource company focused on copper and gold exploration in under-explored, historic and emerging mining districts in British Columbia and Yukon. The Company acquires and develops conceptual, early and mid-stage exploration opportunities and advances them towards resource development. BCGold has generated 27 early to mid-stage gold and copper-gold properties in British Columbia and Yukon.

BCGold’s primary gold asset is the 100% owned, historic high-grade gold Engineer Mine property, where the Company has defined a gold concentrate production opportunity through continued exploration, bulk sampling and on-site milling. The Company has recently consolidated its land position at Engineer Mine, acquiring key claims believed to partially overlay the source area for the Engineer Mine gold mineralizing system. The Company’s strategy at Engineer Mine is to focus exploration for an economic shear-hosted gold deposit and to continue efforts to secure a qualified partner to finance the gold concentrate production opportunity.
