resource development. BCGold has generated 27 early to mid-stage gold and copper-gold properties in British Columbia and Yukon.

BCGold's primary gold asset is the 100% owned, historic high-grade gold Engineer Mine property, where the Company has defined a compelling gold concentrate production opportunity through continued exploration, bulk sampling and on-site milling. The Company has recently consolidated its land position at Engineer Mine, acquiring key claims believed to overlay the source area for the Engineer Mine gold mineralizing system. The Company's strategy at Engineer Mine is to focus exploration on an economic epithermal gold deposit, and to continue efforts to secure a qualified partner to finance the gold concentrate production opportunity.
