

For Immediate Release

**BCGOLD CORP. COMMENCES WORK PROGRAM
AT MINTO-CARMACKS COPPER-GOLD PROPERTY IN YUKON**

Vancouver, British Columbia, September 23, 2013 (TSX-V: BCG) – BCGold Corp. (“BCGold” or the “Company”) is pleased to announce that exploration work has commenced on its 100%-owned WS Property (the “Property”) in central Yukon. The Property is situated adjacent and along strike with Copper North Mining Corp.’s Carmacks Copper Project (the “Carmacks Project”), which has Proven and Probable Reserves of 11.5 million tonnes grading 0.98% total copper, 0.44 g/t gold and 4.3 g/t silver and is in the final stages of mine permitting.

The WS exploration program, partly funded by a \$25,000 Yukon Mining Incentives Program (YMIP) grant, is designed to enhance current drill targets on the Property, which are interpreted to be the strike extents of Zones 12 and 14 of the Carmacks Project. Previous drill testing by BCGold intersected two near-surface copper sulphide horizons averaging 0.17% Cu over 63.1 metres (see January 13, 2009 news release). The 2013 exploration program will consist of the following:

- detailed high-resolution IP geophysics near the claim boundary of the Carmacks Project and the Property;
- a limited program of VLF geophysics and biogeochemical sampling, as alternative techniques to delineate further the strike extent of Zones 12, 14 and the ICE showing;
- geological mapping and prospecting over a 2.5 km² prospective area with IP and magnetic signatures and elevated copper-in-soil anomalies that are suggestive of near-surface, Minto-style mineralization.

BCGold’s 2013 exploration program will take approximately four weeks to complete. The IP geophysics program is being conducted by GroundTruth Exploration based in Dawson, Yukon. The concurrent VLF geophysics and biochemical sampling programs are being conducted by Dumas Consulting and Core Assets Consulting, both independent contractors to the Company. Biogeochemical samples will be submitted to Activation Laboratories Ltd. in Kamloops, British Columbia, an ISO 9001:2008 accredited laboratory. The work program is supervised by Darren O’Brien, P.Geo., Vice President of Exploration for BCGold and a Qualified Person as defined by National Instrument 43-101. Mr. O’Brien has reviewed and approved the technical contents of this news release.

About BCGold

BCGold is a Vancouver-based junior resource company focused on generative copper and gold exploration in under-explored historic and emerging mining districts in British Columbia and Yukon. The Company acquires and develops conceptual, early and mid-stage, exploration opportunities and advances them towards resource development by sourcing preferred joint venture partners and exploration alliances. BCGold Corp has generated 27 early to mid-stage gold and copper-gold properties in British Columbia and Yukon.

BCGold Corp’s primary gold asset is the 100% owned, historic high-grade gold Engineer Mine property, where the Company has defined a compelling gold concentrate production opportunity through continued
