

## Mineral Specimens for Sale—Engineer Mine, B.C.

BCGold Corp. had the pleasure of hosting geological specimen collector David K. Joyce at the historic Engineer Mine during the Company's 2012 Engineer Mine exploration and development program. Mr. Joyce worked alongside the Company's crews to search in active and historically producing zones and dumps of the mine in order to collect specimens “that reflect the unique geology and mineralogy [of Engineer Mine].”

Mr. Joyce is offering the beautiful mineral specimens that he collected for sale to shareholders, collectors, museums, and anyone else interested in capturing a piece of the Engineer Mine legacy.

Go to David K. Joyce Minerals \* at [www.davidkjoyceminerals.com/pagefiles/engineermine.asp](http://www.davidkjoyceminerals.com/pagefiles/engineermine.asp) to view or select one for yourself. On Mr. Joyce's site you will find detailed information, images, and prices for a number of calcite and quartz, electrum, and stibarsen-arsenic specimens from Engineer Mine.
